

BizFAX Application Firmware Update

You can update firmware through the following two ways:

1. Update through TFTP

Step 1: Download the update file. (e.g. 9.22.0.15.bin)

Download link: <http://www.yeastar.com/download/BizFAX-E/>

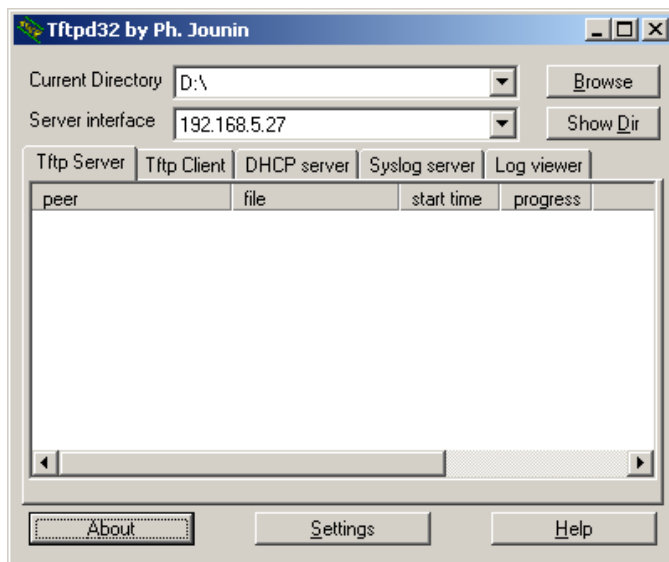

Step 2: Create tftp Server (For example, tftpd on Windows)

1) Install tftpd32 software on computer

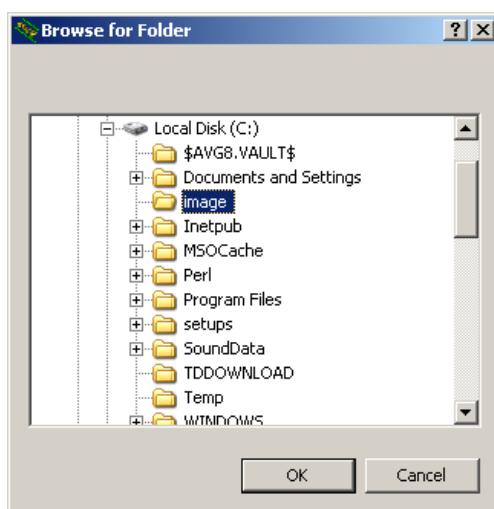

Download link: http://tftpd32.jounin.net/tftpd32_download.html

2) Configure tftpd32

On option 'Current Directory', click 'Browse' button, choose the firmware file of BizFAX upgraded patch, such as C:\Image\9.22.0.15.bin

Picture-02

Step3: On BizFAX's configuration page, select **System Settings**→**Firmware update**→**Download Image From A** , choose 'TFTP Server':

- 1) TFTP Server: fill in IP address of tftpd32 server, such as 192.168.5.27
- 2) File Name: enter the name of firmware update, such as 9.22.0.15.bin
- 3) Click 'Start' to upgrade

The screenshot shows a web form titled "Download Image From A:". It has two radio buttons: "HTTP URL" (unselected) and "TFTP Server" (selected). Below the radio buttons are three input fields: "TFTP Server:" with the value "192.168.5.27", "File Name:" with the value "EX00-9.21.0.52.bin", and "Reset Configs:" with an unchecked checkbox. At the bottom center is a green "+ Start" button.

2. Update through HTTP

On BizFAX's configuration page, select **System Settings** → **Firmware update** →**Download Image From A** , choose 'HTTP Server':

- 1) HTTP URL: Enter the update image file download link.
Example: <http://www.yeostar.com/download/BizFAX-E/9.22.0.15.bin>
- 2) Click 'Start' to upgrade

The screenshot shows a web form titled "Download Image From A:". It has two radio buttons: "HTTP URL" (selected) and "TFTP Server" (unselected). Below the radio buttons are two input fields: "HTTP URL:" with the value "om/download/BizFAX-E/EX00-9.21.0.22.bin" and "Reset Configs:" with an unchecked checkbox. At the bottom center is a green "+ Start" button.

Note:

1. If enabled 'Reset configs', BizFAX will restore to factory default settings.
2. If you're failed to upgrade through HTTP, please try again by TFTP way.
3. If you're again failed through TFTP upgrade way, please turn off your computer's firewall, and then retransfer.

If the update is successful, you will see the version info. on system information.
