

## Connect SIP to Skype

The SIP protocol has already become an industry standard for VoIP. Thousands of telephone companies, IP phone manufacturers and IP based PBX systems, such as Asterisk, Trixbox, are using this protocol to connect calls.

However, the proprietary communication tool 'Skype' has become something of a cult among the young, and Skype users will be greatly benefit from the SkypeOut discount.

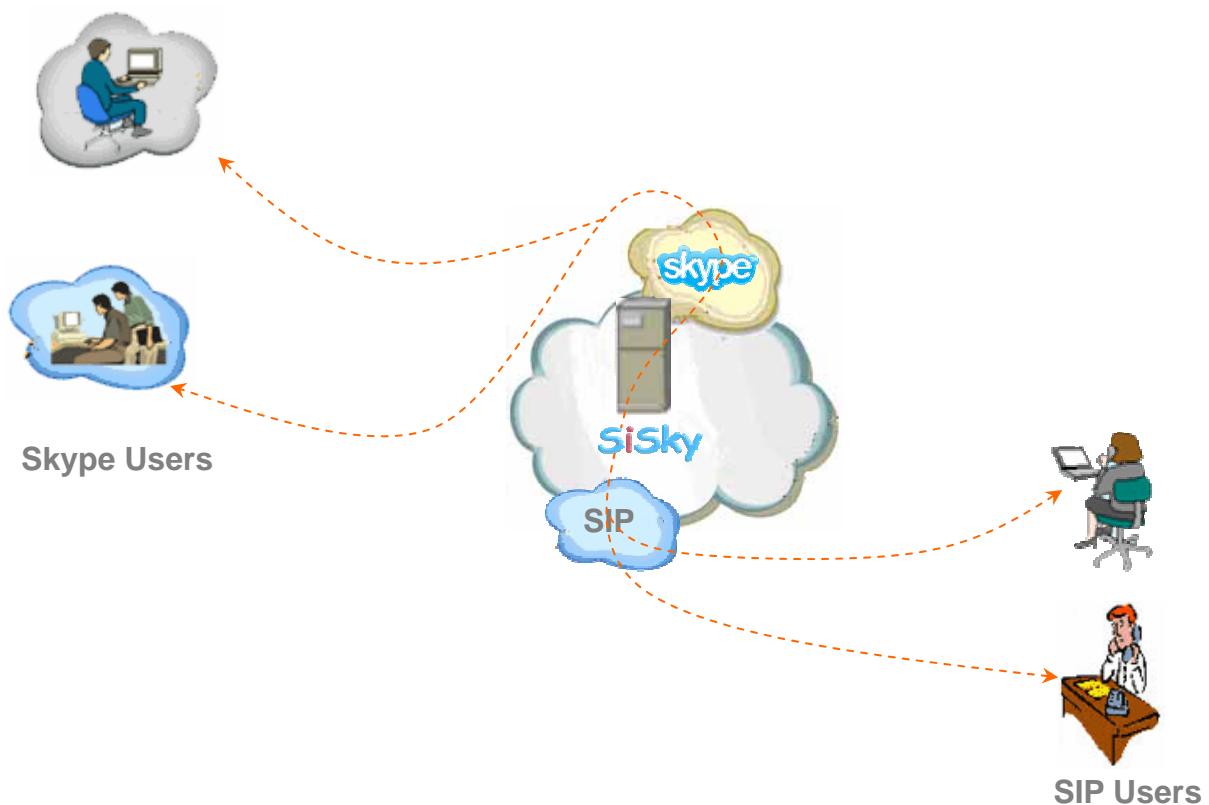

This software SiSky<sup>EE</sup> lets you connect calls between the two systems.

SiSky<sup>EE</sup> can be easily added to your SIP network and seamlessly interfaces with a current system. Maximum 16 channels could effectively meet different requirements.

### Features:

1. Up to 16 channels Simultaneous Talking
2. Incoming Skype call can be forward to an idle Skype channel automatically
3. Incoming SIP call can be forward to an idle SIP channel automatically
4. Define Direct-Line or Speed-Dial to match your dial plan
5. Quick and easy operation and no training required.
